

Wee 1 Recruiting Update

So far, we have interviewed two experts in the language learning field: a principal of a language school in China who has 5+ years of industry experience and a middle school English teacher who has 6 years of teaching experience in Chengdu Foreign Languages School (CFLS). We also interviewed an adult who learned English as their second language about their experience learning English. We found all of these interviews to be very helpful and will focus on doing more needfinding interviews with potential users this week.
